

Bring
the
outside
in

A room with a view.

The beauty of conservatories and orangeries is that they can be designed around your needs to become the focal point for your family's lifestyle, a room of choice for guests, a place to share treasured moments or somewhere to relax after a hard day.

We've been making conservatories since 1995 and Wendland systems are at the cutting edge of conservatory technology. We were the first company to gain the government-backed BBA certification for the quality of our products.

Now, our newest generation of Wendland conservatories are compatible with the latest orangery and solid roof innovation to help create a beautiful, warm, bright space for you to enjoy everyday.

Your own space for your own time.

Space and light is at the heart of your conservatory. With the outside so close, there's a sense of freedom, no dark walls and ceilings, just light.

Relax and unwind, read a book, enjoy your garden and drift away from the pace of everyday life.

A natural bridge between your garden and the great outdoors

Watch the seasons change in comfort as your conservatory brings outdoor living into the heart of your home.

Throw the doors open and feel the warm summer breeze or close the doors and watch winter pass.

Whether it's supper under the stars, breakfast in the morning sunshine or a lazy lunch to while away a Sunday afternoon, simply savour the food and enjoy the view from your unique Wendland conservatory.

Choices, choices.

With a Wendland conservatory, you can create the space you really want. That's because we've taken the time to make sure almost any design is possible.

The Wendland system is engineered to cope with large spans and difficult shapes and is available in a range of finishes. Do you prefer the clean simplicity of white? What about the rich warmth of a woodgrain finish in rosewood or light oak?

The choice is yours - you can even choose one finish on the outside, and another on the inside.

A comfortable space all year round

South-facing, north-facing, shaded or exposed, you'll want to make the most of your new space.

We recognise you want to keep cool in summer but warm in the winter. With Wendland, anything's possible. Most of our customers choose a glass roof - it lets in all the light you need to bring the outside in. Performance glass panels reflect the unwanted heat and glare from the sun in Summer and help retain warmth during the Winter months.

Forget about stuffy south-facing conservatories. Modern glazing improves thermal efficiency, letting you enjoy your space all year round.

Inquiring minds
need space to
explore.

Imagine somewhere for all those toys, a warm and bright space where your children enjoy playing or the perfect place for family time on a wet afternoon snuggled up on the sofa.

Of course, their own private jungle adventure lies just outside the doors, well within your watchful gaze.

Get the Orangery look

With Wendland you can create the look and feel of an orangery with the addition of an insulated pelmet and an external decorative fascia.

Wendland's insulated pelmet surrounds your new space where the roof meets the windows. Once plastered, it can be painted to match your interior creating a more 'room like' feel without compromising on light. This special insulated pelmet adds thermal efficiency and can also house down lighters or speakers to create something unique.

An external decorative fascia from Wendland adds shape and style to your new space by shielding the gutters and framing the roof to create the overall visual effect of an Orangery.

Insulated Pelmet

Create a glazed extension

If you prefer a solid roof to a glass roof you'll never have to compromise on light with a Wendland conservatory. Solids roofs provide increased thermal performance and an internal vaulted plastered ceiling can turn a conservatory into an extension.

Wendland offer two solid roof systems, Ultraroof and Livinroof, ideal for replacing an old conservatory roof or creating a new glazed extension. Both systems are engineered so you can choose the location and number of glass panels in the roof to let the right amount of light flood into your new room.

Livinroof's unique contemporary grey panelled design enables you to insert shaped glazing into any panel, maximise thermal performance and achieve a stunning internal plastered ceiling.

Ultraroof is the most advanced lightweight tiled roof available on the market today. With the UK's most authentic tiled finish in a choice of three colours, Ultraroof is designed to match the existing roof on your house.

Ultrarof

Choose Wendland and you'll receive a premium product.

A conservatory is possibly the most desirable, yet technically demanding home improvement a homeowner could make. That's why you need a specialist company to deliver your dream conservatory. There are dozens of factors that make a well chosen conservatory special. Here are five for you to think about.

- **Expert design:** We will advise you every step of the way to ensure the design complements your home, makes the most of the space and looks great too.
- **A world of choice:** Whether you're looking for a conservatory, orangery or extension, let your imagination and our experience be your guide.
- **Quality manufacture:** The best of modern materials, professionally constructed, lovingly installed by people who care.
- **Warm and secure:** Energy efficient construction will stand up to any weather for year round use.
- **A flexible space:** We know that as life changes your new space needs to be flexible whether to be used as a dining room, playroom, gym, study, lounge or simply somewhere to escape.

Your space will look just as good in ten years' time - because we insist on using materials that are made to last.

The British Board of Agrément has been testing and approving building products for over 35 years. Wendland were the first company to gain the government backed BBA Certification. So when they say our conservatories make the grade, it's really something.

Conservatory Roof System Overview

The Wendland roofing system has been tested under extreme windspeeds up of 125mph.

Each aspect has been designed and engineered with strength and simplicity in mind to ensure system can achieve any design and is easy to install and fabricate.

Structural 'Spider' Arm

Spider arms are used to provide a simple structural fix between the glazing bar and the spider at the finial point. They are fixed up the center of the rafters.

Eaves Beam Assembly

The eaves beam fixes to the top of the window frames and becomes the structural chassis for the roof.

Rafters

The rafters come in a variety of strengths to cater for different spans and pitches resulting in the ability to achieve any roof shape.

Chambered top caps

The chambers in the top caps act as an extra insulating layer providing better thermal performance from the roof. This structure makes them more rigid and durable over time.

Ridge Assembly

The ridge supports the rafters allowing them to be fixed at the desired angle. Gaskets at the ridge and on the rafter top caps then seal against the glazing.

Starter bar

The starter bar, once bolted to the ridge and eaves, fixes back to the host wall. Its rain baffle ensures that any excess water drains down the bar and into the gutter.

Structure and build

Victorian

Classic. Airy. Versatile. This traditional design works brilliantly - no matter how you want to use your space. Choose three facets, or a more rounded front with five facets.

Victorian

Popular style with a faceted front giving a traditional curved appearance

Georgian

You want as much light and usable space as possible. So this clean and simple design makes perfect sense.

Georgian

A flat-fronted style offers excellent use of the floor space

Gable

A surprising take on the traditional conservatory. This design has a gable front - for an eye-catching space which really blurs the line between your home and your garden.

Gable

The higher ridge height adds a sense of grandeur

Lean - To

Let there be light - flooding into your new space thanks to a simple, elegant design. It's the perfect choice if you live in a bungalow, or if you're faced with planning restrictions on height.

Lean to

Provides a clean, simple look maximising floor space

Combination

So you want a large space. But you also want to keep the drama in your garden. Our combination designs are the perfect answer.

T Shape

Offers a large and versatile floor space with a Victorian, Georgian or Gable style central projection

P Shape

Ideal for a larger conservatory and combines a Victorian (or Georgian) with a lean-to or Offers a large and versatile floor space with 2 'rooms' at either end and a conservatory linking the two.
